

Amendments to the Specification

Please replace the last paragraph beginning on page 6, line 30 and ending on page 7, line 12 with the following amended paragraph:

Organic phosphoric acid esters which can be used according to the invention are, in particular, combinations of the general formula

where X represents hydrogen, Na, K, -NH₂, -NHR, -NR₂, -NH(R'-OH), -N(R'-OH)₂, or -NR(R'-OH), R represents a straight-chain or branched alkyl group with 1 to 14 carbon atoms, in particular 1 to 8, R' is a straight-chain or branched alkyl alkylene group with 1 to 14 carbon atoms, in particular 1 to 8, whereby one or more hydrogen atoms in R and R' can be substituted by a polymer or oligomer group – Y-R, where Y represents (CH₂-CH₂-O-)_m or (CH₂-CH(CH₃)-O-)_m with m = 1 to infinity, and, in particular, m = 1 to 10, R and R' can in each case be equal or different, and n is a number from 0 to 3, with the proviso that n is not 0 if X stands exclusively for hydrogen.
